

# Asset Inspection & Management

## AI-assisted Inspections to Validate Assets, Ensure Compliance, and Manage Network Readiness

IQGeo's Asset Inspection & Management solution enables you to inspect, validate, and manage network assets at scale using visual AI analysis. This reduces manual effort while improving safety, compliance, and data accuracy

### Top 3 Benefits

1

Visual AI inspections at scale

2

Accurate asset condition and compliance validation

3

Inspection results captured into the system of record

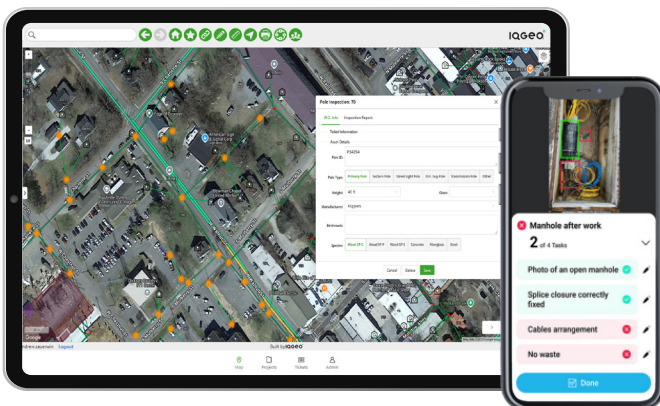

#### Old Way

- ✗ Manual inspection review and photo analysis
- ✗ Disconnected inspection evidence
- ✗ Inconsistent asset condition records
- ✗ High cost and slow inspection programs
- ✗ Limited confidence in compliance and readiness

VS

#### Best Practice

- ✓ Visual AI inspection and validation
- ✓ Inspection data captured in system of record
- ✓ Trusted, validated asset condition data
- ✓ Scalable inspections with reduced manual effort
- ✓ Clear, auditable inspection outcomes

- Visual AI validation at scale
- Mobile inspection workflows
- Scalable inspection program management
- Inspection validation and compliance evidence capture
- Direct integration with the system of record
- Support for asset turn-up and capacity decisions
