

# Pole Audit Service

## Fast, Scalable Pole Attachment Audits With Trusted Results

The Pole Audit Service enables telecom operators to audit pole attachments at scale and validate compliance with confidence. Using AI-assisted visual analysis, expert oversight, and system integration, IQGeo delivers consistent, evidence-backed results that reduce risk and cost.

### Top 3 Benefits

1

AI-assisted visual analysis of pole attachments

2

Configurable audit workflows with expert validation

3

Integration with network systems for reporting and remediation

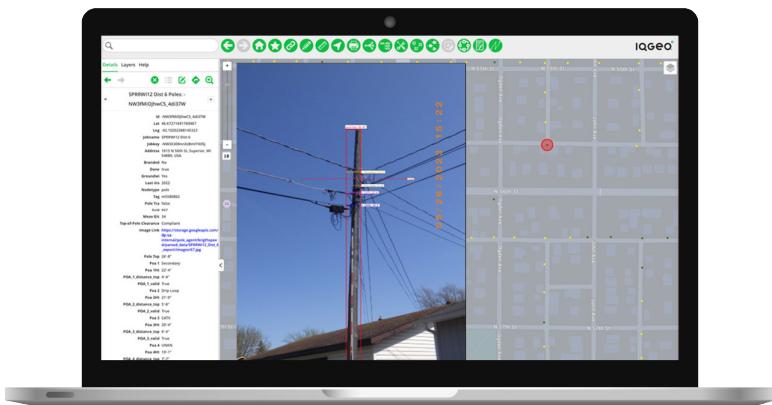

Old Way

VS

Best Practice

- ✗ Manual, field-intensive pole audits
- ✗ Subjective assessments and inconsistent results
- ✗ Limited ability to challenge compliance claims
- ✗ High audit and remediation costs
- ✗ Disconnected audit data and reporting

- ✓ AI-assisted audits executed at scale
- ✓ Consistent, evidence-backed audit findings
- ✓ Trusted results supported by visual evidence
- ✓ Targeted remediation based on verified violations
- ✓ Audit results integrated into network systems

- AI-assisted visual analysis
- Expert-led validation
- Configurable audit workflows
- Evidence-backed reporting
- Integrated delivery
- Scalable service model
